

QUESTION 7.3

Java

```
public void changeStock (int pos)
{
    int pos = 1;

    if (stockArr[pos].getName().equals(name))
    {
        stockArr[pos].setStockLevel(stockArr[pos].getStockLevel()-1);
    }
}
```

Delphi

```
procedure changeStock (pos : integer);
var pos : integer;
begin
    pos := 1;
    if stockArr[pos].getName() = name then
    begin
        stockArr[pos].setStockLevel(stockArr[pos].getStockLevel()-1);
    end;
end;
```
