QUESTION 2
 LOCI
 CAM

The following are given in the adjacent drawing:

- the incomplete **graph of displacement** in position of a **wedge-ended follower**.
- the vertical and horizontal centre lines of the camshaft.
- the shaft and follower detail at the starting position.

The cam imparts the following motion to the follower:

- 0° – 60° the follower **drops** 20 mm with **uniform motion**.
- 60° – 105° the follower is at **rest**.
- 105° – 195° the follower **drops** 34 mm with **simple harmonic motion**.
- 195° – 240° the follower is at **rest**.
- 240° – 360° the follower returns to its original position with **uniform acceleration and retardation**.

The cam profile has the following specifications:

- The direction of rotation is **anti-clockwise**.

Now do the following:

- 2.1 Draw the complete graph of displacement.
- 2.2 Draw and hatch the camshaft.
- 2.3 Draw the wedge-ended follower to the given measurements.
- 2.4 Draw the direction of rotation.
- 2.5 Draw and label all the divisions on the cam profile.
- 2.6 Draw the cam profile from the displacement graph.
- 2.7 Print, in capitals, the required **label** for the graph of displacement at A.
- 2.8 Show all constructions.

QUESTION 4
MECHANICAL ASSEMBLY

Figure 1 shows the different parts (not to scale) for a **SPRING-LOADED RELIEF VALVE** that needs to be assembled.

The **exploded front view** of how the parts are assembled is also shown. Complete the following on Answer Sheet 4 to a **scale of 1:1**. Use the given centre lines and point P on the valve body (Part A) as a reference to plan the drawing layout.

- 4.1 Draw a **full sectional front view** of the assembled parts on cutting plane A-A. Draw only one bolt (Part E) and one washer (Part F) on the left-hand side of the front view.
- 4.2 Draw an **outside right view** of the assembled parts on the given centre line. Do **not** draw the tension adjuster (Part C), the compression spring (Part H) and the sphere (Part G) in this view.
- 4.3 Please note the following:
 - 4.3.1 Show **3 faces** for the **M14 hexagonal bolt-head** in the **front view**.
 - 4.3.2 Show the **hidden detail** of only the valve (Part D) in the **right view**.
 - 4.3.3 Draw the centre lines on the **front view** only.
 - 4.3.4 Draw the **cutting plane** and the **"PCD"** centre line in the **right view**.
 - 4.3.5 Insert **3 functional dimensions** in the **right view**.
 - 4.3.6 Print the **title** and **scale** in the space provided.
 - 4.3.7 Correctly label the completed **front view**.
- 4.3.8 Match point Q on the tension adjuster (Part C) with point Q on the compression spring (Part H), when assembling the parts.
